

HTML Canvas

Your team task is to build the [mister-canvas](#) painting program:

- User selects a color
- User selects a shape
- User can draw the shape freely on the canvas
- Add a pencil drawing option
- Make it work with touch events
- Add download feature
- Add upload feature
- Add share to facebook feature
- Bonus: Adjust the size of the shape dynamically. correlating it with cursor's speed
- Play with some random variations, get [some inspiration](#)
